1. Deskripsi Praktikum

Praktikum menghasilkan sebuah website autobiografi (Curriculum Vitae) berbasis WordPress yang dikembangkan menggunakan kombinasi sistem WordPress dan saya menambahkan kode manual (HTML, CSS, JavaScript). Website dibangun terlebih dahulu di localhost menggunakan XAMPP, kemudian dipindahkan ke hosting InfinityFree dan diperbaiki sampai berfungsi normal. Website memiliki dua halaman utama, yaitu halaman Home (autobiografi) dan halaman Blog (iframe Student Telkom University).

2. Tujuan Praktikum

Tujuan dari praktikum ini adalah:

1. Membuat halaman autobiografi/portfolio menggunakan WordPress.
2. Mengimplementasikan HTML, CSS, dan JavaScript secara manual melalui plugin "Custom CSS & JS".
3. Membuat halaman Blog menggunakan iframe.
4. Melakukan migrasi WordPress dari localhost ke hosting InfinityFree.
5. Melakukan konfigurasi database dan penyesuaian file wp-config.php.
6. Mengatasi error setelah migrasi, seperti:
 - o Gambar tidak tampil di HP
 - o Gambar tidak tampil di awal migrasi
 - o Link file masih menggunakan localhost
7. Menyusun laporan praktikum beserta dokumentasi screenshot

3. Alat dan Bahan

- Laptop & HP (untuk pengujian tampilan responsif)
- XAMPP (untuk localhost)
- WordPress
- Plugin Custom CSS & JS
- Plugin HTML Insert Block (Gutenberg)
- Hosting InfinityFree
- FileZilla FTP Client
- phpMyAdmin
- Browser Edge & HP

4. Tahapan Praktikum

4.1. Instalasi WordPress di Localhost

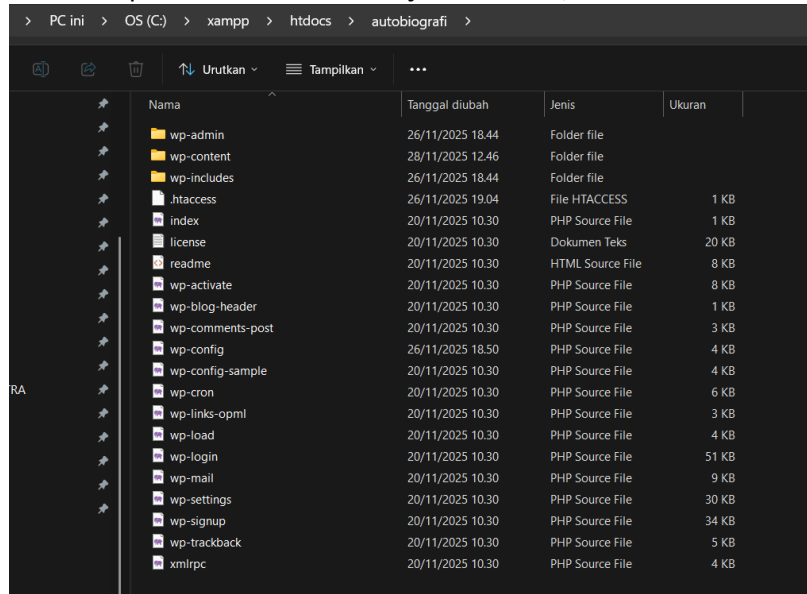

WordPress dipasang di:

`http://localhost/autobiografi/`

Folder utama berada di:

`C:/xampp/htdocs/autobiografi/`

Pada tahap ini semua elemen **berjalan normal**, termasuk:

4.2. Pembuatan Halaman Autobiografi (Home)

Halaman Home tidak menggunakan tema bawaan secara penuh, tetapi mengganti konten menggunakan:

- HTML custom
- CSS custom
- JavaScript interaktif
- Struktur layout 2 kolom
- Modal foto
- Skill bar animasi
- Logo Telkom University
- Bagian pendidikan, project, dan kontak

Konten dimasukkan menggunakan blok **Custom HTML** pada Gutenberg.

4.3. Pembuatan Halaman Blog Menggunakan Iframe

Kode iframe dipasang menggunakan HTML untuk menampilkan isi dari blog [Student Blogs Telkom Univeristy – Telkom University, Empowering You To Become Creative](https://student.telkomuniversity.ac.id/) :

```
<div class="telkom-iframe-container">
  <iframe src="https://student.telkomuniversity.ac.id/"
    width="100%"
    height="600"
    frameborder="0"
    allowfullscreen>
  <p>Browser Anda tidak mendukung iframe.
    <a href="https://student.telkomuniversity.ac.id/" target="_blank">Klik di sini</a> untuk membuka
    halaman.
  </p>
</iframe>
</div>
```

DISINI SAYA MENGGUNAKAN CSS DAN JS JUGA PADA HALAMAN BLOG AGAR

CSS PADA BLOG :

```
/* Reset styling untuk halaman blog */
.page-template-blog .site-header,
.page-template-blog .site-footer,
.page-template-blog .sidebar,
.page-template-blog .comments-area,
.page-template-blog .post-navigation,
.page-template-blog .entry-header,
.page-template-blog .entry-footer {
  display: none !important;
}

/* Fullscreen iframe styling */
.blog-iframe-container {
  position: fixed;
  top: 0;
  left: 0;
  width: 100%;
  height: 100vh;
  background: white;
  z-index: 9999;
}

.blog-iframe-container iframe {
  width: 100%;
  height: 100%;
  border: none;
  display: block;
}

/* Back button styling */
.blog-back-button {
  position: fixed;
  top: 20px;
  left: 20px;
  z-index: 10000;
  background: #007cba;
  color: white;
  padding: 10px 20px;
  border-radius: 5px;
  text-decoration: none;
  font-weight: bold;
  box-shadow: 0 2px 10px rgba(0,0,0,0.3);
  transition: all 0.3s ease;
}

.blog-back-button:hover {
  background: #005a87;
  transform: translateY(-2px);
  color: white;
  text-decoration: none;
}

/* Loading spinner */
.iframe-loading {
  position: fixed;
  top: 50%;
  left: 50%;
  transform: translate(-50%, -50%);
  z-index: 10001;
}

.spinner {
  border: 4px solid #f3f3f3;
  border-top: 4px solid #007cba;
  border-radius: 50%;
  width: 50px;
  height: 50px;
}
```

```

    animation: spin 2s linear infinite;
  }

  @keyframes spin {
    0% { transform: rotate(0deg); }
    100% { transform: rotate(360deg); }
  }

  /* Responsive adjustments */
  @media (max-width: 768px) {
    .blog-back-button {
      top: 10px;
      left: 10px;
      padding: 8px 16px;
      font-size: 14px;
    }
  }

  /* Hide all other elements when iframe is present */
  body.has-blog-iframe {
    margin: 0 !important;
    padding: 0 !important;
    overflow: hidden !important;
  }

  body.has-blog-iframe header,
  body.has-blog-iframe footer,
  body.has-blog-iframe .sidebar,
  body.has-blog-iframe .widget-area,
  body.has-blog-iframe .comments-area,
  body.has-blog-iframe .post-navigation,
  body.has-blog-iframe .entry-header,
  body.has-blog-iframe .entry-footer {
    display: none !important;
  }

```

JS PADA BLOG :

```

<?php
/*
Template Name: Fullscreen Iframe
*/
?>

<?php get_header(); ?>

<div class="fullscreen-iframe-page">
  <?php if (have_posts()) : while (have_posts()) : the_post(); ?>
    <div class="iframe-content">
      <?php the_content(); ?>
    </div>
  <?php endwhile; endif; ?>
</div>

<?php get_footer(); ?>

```

Kesimpulan Singkat

CSS dan JS pada halaman Blog digunakan untuk:

- Menghilangkan elemen tema WordPress
- Menampilkan iframe dalam mode fullscreen
- Membuat tampilan lebih bersih dan responsif
- Menambahkan tombol kembali
- Memberikan animasi loading
- Menyesuaikan tampilan mobile
- Menghindari scroll ganda
- Menggunakan template halaman khusus iframe

Semua ini digunakan agar halaman Blog tampil lebih profesional dan mudah digunakan.

Penjelasan Kenapa Header, Footer, dan Layout WordPress Masih Muncul di Halaman Blog

Pada halaman Blog, saya menggunakan template **Fullscreen Iframe** dan menambahkan **CSS khusus** untuk menyembunyikan seluruh elemen default WordPress seperti:

- Header
- Footer
- Sidebar
- Navigation
- Comments area

Tujuannya adalah agar halaman Blog hanya menampilkan **iframe** tanpa gangguan layout dari tema.

Contoh aturan CSS yang dipakai:

```
.page-template-blog .site-header { display: none !important; }  
.page-template-blog .site-footer { display: none !important; }  
...
```

Namun **setelah website dihosting di InfinityFree**, tampilan Blog masih menunjukkan:

- Header tema masih ada
- Toolbar WordPress masih muncul
- Layout tema tidak hilang

Setelah dilakukan pengecekan, penyebabnya adalah:

CSS khusus fullscreen iframe belum diterapkan/diaktifkan di halaman yang sudah terlanjur di-hosting

Disini saya mohon maaf atas kelupaan saya ini dan saya terlanjur ke hosting dan tidak memperbaiki dulu, jadi agar tidak mengulur waktu saya jelaskan saja disini hehe.

4.4. Pembuatan CSS dan JavaScript Melalui Plugin

CSS berfungsi untuk:

- Styling hero section
- Membuat layout grid
- Membuat sidebar sticky
- Membuat modal foto
- Animasi skill bar
- Responsif HP/Laptop
- Warna Telkom University

JavaScript berfungsi untuk:

- Membuka dan menutup modal foto
- Animasi skill bar
- Simulasi tombol download CV
- Error handling gambar

4.5. Migrasi WordPress ke Hosting InfinityFree

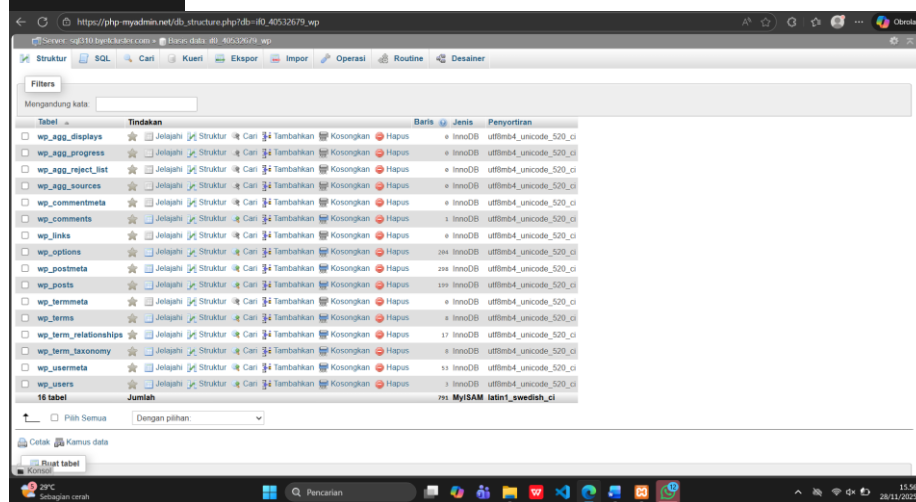

Website dipindahkan ke domain:

```
https://autobiografiganes.rf.gd
```

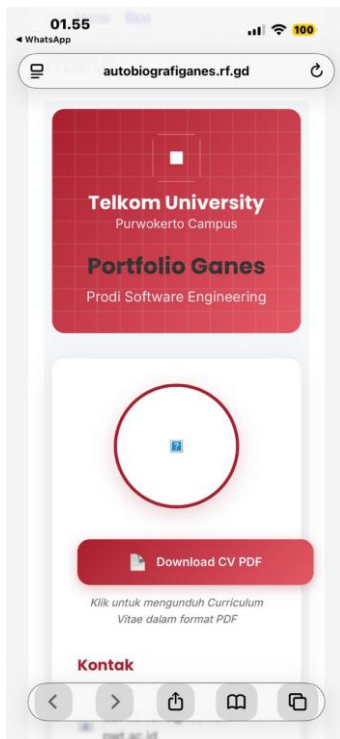

Migrasi dilakukan dengan:

1. **Export database dari localhost**
2. **Import database ke phpMyAdmin InfinityFree**
3. **Upload semua file WordPress melalui FileZilla**
4. **Mengganti wp-config.php agar sesuai hosting**

BERIKUT SCREENSHOOT NYA :

Sebelumnya masih berupa link local terus saya ubah ke link hosting Guna nya agar saat klik link website hosting tidak tersambung ke local, jadi memang harus diganti dari link local ke link hosting tersebut

Problem sebelumnya saat buka melalui HP tampilan foto tersebut tidak terlihat atau tidak tampil, tampilan ini ada di dalam folder Wp-content, sebelumnya saya kira error di dalam folder content tersebut dan saya upload ulang dari filezilla maupun di filemanager.ai, ternyata hasilnya tetap tidak ada perubahan, setelah itu saya cek melalui database problemnya :

http://localhost/autobiografi/wp-content/uploads/2025/11/Gambar-WhatsApp-2025-11-22-pukul-03.08.25_81b16db7.jpg

⚠️ Ini SALAH TOTAL untuk hosting.

Gambar masih menunjuk ke **localhost** (komputer kamu sendiri), jadi:

- Di laptop gambar muncul → karena file ada di komputer saya
- Di HP gambar hilang → karena HP tidak bisa akses *localhost komputer saya*

→ Jadi bukan salah theme, bukan salah hosting, bukan salah upload ulang.

→ Yang salah **URL gambarnya masih yang di lokal**, belum diganti ke URL hosting.

Dan YES, **solusinya memang harus diperbaiki di DATABASE WordPress.**

✂️ **CARA MEMPERBAIKI (jalankan SQL ini di phpMyAdmin)**

Masuk phpMyAdmin → pilih database → tab **SQL** → paste:

1 Perbaiki URL gambar di konten post/page :

```
UPDATE wp_posts
SET post_content = REPLACE(post_content, 'http://localhost/autobiografi',
'https://autobiografiganes.rf.gd');
```

2 Perbaiki URL gambar di metadata (featured image, builder, dll) :

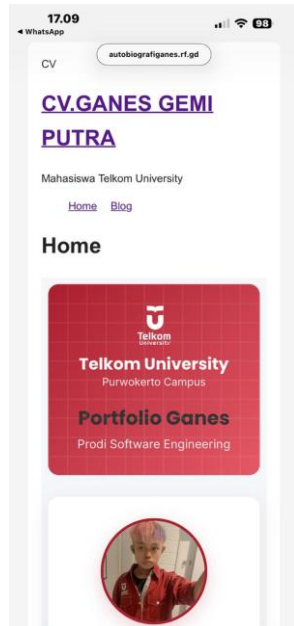

```
UPDATE wp_postmeta
SET meta_value = REPLACE(meta_value, 'http://localhost/autobiografi', 'https://autobiografiganes.rf.gd');
```

3 Perbaiki jika ada sisa di wp_options :

```
UPDATE wp_options
SET option_value = REPLACE(option_value, 'http://localhost/autobiografi',
'https://autobiografiganes.rf.gd');
```

INI PERBAIKAN SEMUA UNTUK JAGA JAGA BILA MANA YANG LAIN MASIH ADA ERROR

SETELAH DIPERBAIKI :

4.5. Migrasi WordPress ke Hosting InfinityFree

Website dipindahkan ke domain:

<https://autobiografiganes.rf.gd>

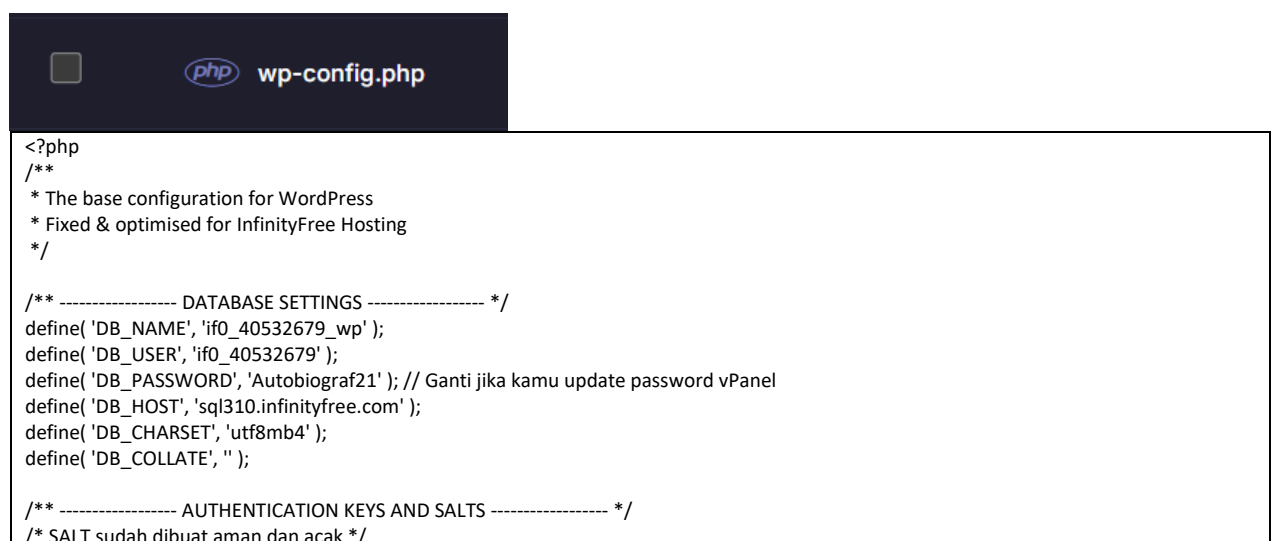

Migrasi dilakukan dengan:

1. Export database dari localhost
2. Import database ke phpMyAdmin InfinityFree
3. Upload semua file WordPress melalui FileZilla
4. Mengganti wp-config.php agar sesuai hosting

4.6. Konfigurasi wp-config.php di Hosting

Konfigurasi final yang digunakan:

DB_NAME: if0_40532679_wp
DB_USER: if0_40532679
DB_PASSWORD: Autobiograf21
DB_HOST: sql310.infinityfree.com

```

    define( 'ABSPATH', __DIR__ . '/' );
}

/** Sets up WordPress vars and included files. */
require_once ABSPATH . 'wp-settings.php';
```

SALT telah diganti menjadi kunci acak.

Fitur editing file dinonaktifkan:

```
define('DISALLOW_FILE_EDIT', true);
```

Ini meningkatkan keamanan hosting.

4.7. Perbaikan Database Setelah Migrasi

Tabel wp_options berisi:

option_name	sebelumnya	sesudah diganti
siteurl	localhost/autobiografi	https://autobiografiganes.rf.gd
home	localhost/autobiografi	https://autobiografiganes.rf.gd

Dengan mengganti kedua value tersebut:

- WordPress membaca URL hosting
- Gambar mulai muncul
- CSS/JS aktif kembali

4.8. Perbaikan Media & Upload Gambar

Pada FileZilla, muncul **Failed Transfers**.

Ini menyebabkan:

- Gambar tidak tampil di HP
- Foto profil modal error
- Logo kampus hilang

Setelah klik **Retry Failed Transfers**, semua gambar berhasil ter-upload.

4.9. Pengujian Website di Laptop & HP

Laptop → gambar tampil

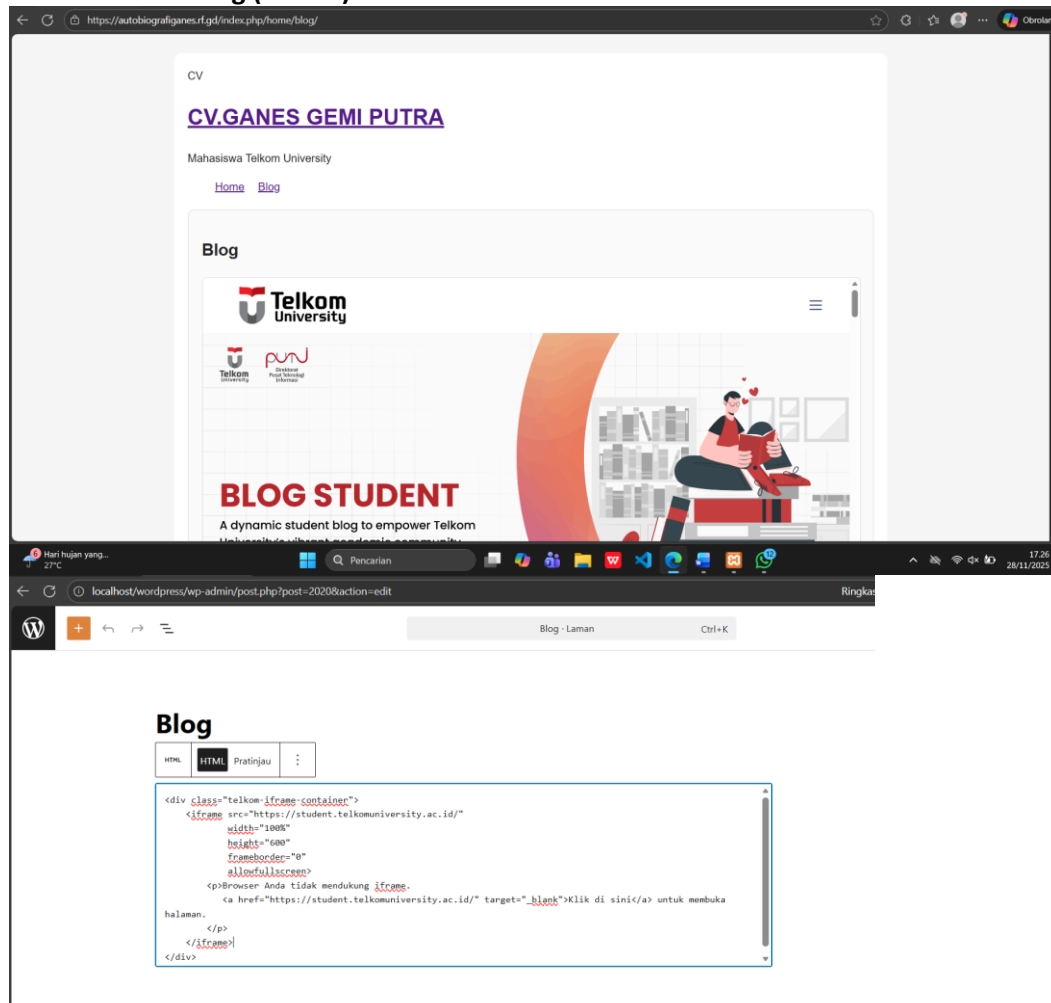

Karena laptop pernah membuka localhost sehingga cache masih tersimpan.

HP → gambar tidak tampil

Karena HP tidak bisa mengakses "localhost" dan URL gambar masih salah.

Setelah database diperbaiki, semua gambar tampil di HP.

4.12. Kesimpulan Praktikum

1. Website autobiografi berhasil dibuat menggunakan WordPress dengan custom HTML, CSS, dan JavaScript.
2. Migrasi ke hosting InfinityFree berhasil dilakukan dengan:
 - penyesuaian database
 - perbaikan wp-config.php
 - upload file lengkap

Proses saya menggunakan File manager namun jika ada folder yang tidak bisa di hapus barulah saya menggunakan filezilla
